

George Mathew

georgevmathew.com
george.megg1@gmail.com | 614.535.8678

EDUCATION

NORTH CAROLINA STATE

MS IN COMPUTER SCIENCE

Expected May 2016 | Raleigh, NC

Current. GPA: 3.89

AMRITA UNIVERSITY

B.TECH IN ELECTRONICS ENGG

July 2008 - May 2012 | CBE, India

College of Engineering

Cum. GPA: 3.92 / 4.0

FOOTPRINTS

Github: [bigfatnoob](#)

LinkedIn: [georgevmathew](#)

Twitter: [@dbigfatnoob](#)

Facebook: [george.mathew.1690](#)

COURSEWORK

GRADUATE

Advanced Machine Learning

Automated Software Engineering

Advanced Algorithms

Database Management Systems

Compilers

UNDERGRADUATE

Pattern Recognition

Agent Based Modelling

Image Processing

Speech Recognition using SVM

SKILLS

PROGRAMMING

Experienced:

Java • JavaScript • HTML • Matlab

MySQL • Python • MongoDB • CSS

Semi-Pro:

C++ • R • Redis • Clojure • \LaTeX

Familiar:

PHP • Android • Shell • Haskell

PET PROJECTS

Region.io: Online bookmark manager.

Octorater: Movie Predictor on Trident

Optima: Multi Objective Optimization algorithms framework

EXPERIENCE

FACEBOOK | SOFTWARE ENGINEERING INTERN

May 2015 – August 2015 | Menlo Park, CA

- Worked on query parsing and big data management across regions for facebook infrastructure data.
- Created a thrift based API to help data migrate efficiently across datacenters.

CROWDCHAT | SOFTWARE ENGINEER

October 2013 – June 2014 | Hyderabad, India

- Developed crowdchat.net, a hash-tag based chat platform. It was built using the NodeJS Redis stack. Bootstrap, jQuery and client jade were used to develop the user interface.
- Worked on platform.crowdchat.net, a data analytics platform that helps you connect with people and subscribe to their activities on twitter. The application was built on the Java MySQL stack and successfully scaled to hold more than 250 GB of analyzed data. Full text search was provided using Apache Solr.

PAYODA TECHNOLOGIES | SOFTWARE DEVELOPMENT ENGINEER

June 2012 – September 2013 | Coimbatore, India

- Created a REST based module to register a device into AppViewX, which is a software load balancer.
- Developed an aggregation module on mongoDB using map-reduce to aggregate statistics periodically.
- Designed and developed a topological view to display hierarchy of an application using javascript.

RESEARCH

REAL WORLD ARTIFICIAL INTELLIGENCE FOR SOFTWARE ENGINEERING

Oct 2014 – Present | Raleigh, NC

- Software Effort Estimation using machine learning algorithms on industrial software projects. Statistical analysis on ranking effort estimators using parametric and non parametric statistical tests.
- Optimizing requirements engineering models on i* frameworks using multi objective optimization techniques.
- Developing an artifacts manager to maintain artifacts from research papers.

NASA JET PROPULSION LABORATORY

Jan 2015 – May 2015

- Software Quality Prediction for their space programs.
- Published in NASA Cost Symposium 2015.

PUBLICATIONS

June 2015

NASA Software Cost Estimation Model: An Analogy Based Estimation Method

April 2012
